Actual Church Sample—Faith Community Church

What would your church's health profile look like?

FAQs

How do you gather this information?

You are sent an anonymous questionnaire and instructions. You take five minutes of your regular worship service(s), asking everyone over the age of 13 to complete the questionnaire. You return the questionnaire to Church Doctor Ministries.

What do we receive?

A graphic assessment of the health and vitality of your church in nine categories.

What do the nine categories measure?

1. The percentage of those in your church who say they are growing spiritually; 2. The percentage of those involved in Bible study; 3. Those who approach their financial support

proportionally; 4. Those who return 10% or more in their financial giving; 5. The percentage of those involved in service; 6. Those who perceive the mission of the church as the Great Commission, to make disciples; 7. The percentage of those who focus primarily on the church's future, rather than the past; 8. The percentage of those who have positive feelings about the church; 9. The percentage of church members who have a high level of ownership of the church and its ministry.

Will there be an explanation of each category?

Yes, you will receive a 16-page booklet that provides a commentary on your results.

Will there be a prediction of how much we can grow in each of these nine areas?

Yes, you will receive a forecast of how much your church can grow in 6 months and how you can achieve that growth.

How can you predict the achievement levels?

This approach is based on research of churches of various sizes throughout the U.S. from various affiliations, in a wide variety of settings (rural, suburban, urban, etc.).

What will it cost?

\$150

How long before we receive results?

30-60 days.

“Our worship attendance is about 200. If those involved in Bible study could grow by 15%, that would be 30 new people in Bible study!”
